

Theory Questions

Basic Questions

1. What is JSP?
2. Difference between Servlet and JSP?
3. What is JSP lifecycle?
4. What are JSP elements?
5. What is page directive?

Concept-Based Questions

6. What are scriptlets?
7. What are JSP expressions?
8. What are JSP declarations?
9. What are implicit objects?
10. What is EL?

Exception Handling Questions

11. What is `errorPage`?
12. What is `isErrorPage`?
13. How to handle exceptions in JSP?
14. What is custom error page?
15. What happens if error not handled?

Advanced Questions

16. What is JSTL?
17. What is `useBean` tag?
18. What is `include` directive?
19. Difference between `include` directive and `action` tag?
20. What is MVC in JSP?

Scenario-Based Questions

21. How to display dynamic data?
22. How to pass data from servlet to JSP?
23. How to handle form in JSP?
24. How to reuse JSP components?
25. How to design MVC?

Programming MCQs

1. `<%= 10+20 %>`

- A. 30
- B. Error
- C. 1020
- D. Null

2. `<% int x=10; %>`

- A. Scriptlet
- B. Expression
- C. Directive
- D. EL

3. `${10+5}`

- A. 15
- B. Error
- C. 105
- D. Null

4. `<%@ page import="java.util.*" %>`

- A. Import
- B. Error
- C. Loop
- D. Print

5. `request.getAttribute("name");`

- A. Get data
- B. Store
- C. Error
- D. Delete

6. `<jsp:include page="a.jsp"/>`

- A. Include
- B. Redirect
- C. Error
- D. Loop

7. `<%! int x=10; %>`

- A. Declaration
- B. Expression
- C. Scriptlet
- D. Error

8. `<%= request.getParameter("name") %>`

- A. Print input
- B. Error
- C. Store
- D. Delete

9. `${param.name}`

- A. Get parameter
- B. Error
- C. Store
- D. Delete

10. `<jsp:forward page="home.jsp"/>`

- A. Forward
- B. Redirect
- C. Error
- D. Loop

Practice Programs

1. Simple JSP Page

Description:

Create a basic JSP page that displays static text in the browser.

Output:

"Welcome to JSP"

2. JSP Expression Demo

Description:

Demonstrate use of JSP expression tag.

Task:

- Perform simple calculation
- Display result using `<%= %>`

Output:

30 (for example: 10 + 20)

3. Form Handling

Description:

Create an HTML form and process input in JSP.

Task:

- Accept user input (name, age)
- Display values on JSP page

4. Display Servlet Data

Description:

Display data sent from a Servlet to JSP.

Task:

- Use `request.setAttribute()` in servlet
- Retrieve using `getAttribute()` in JSP

5. EL (Expression Language) Example

Description:

Use EL to display dynamic data in JSP.

Task:

- Access request parameters using `${ }`

Example Output:

Hello John

6. JSTL Example

Description:

Use JSTL tags to perform operations in JSP.

Task:

- Use `<c:forEach>` or `<c:if>`
- Display list or condition-based output

7. Include Files

Description:

Reuse JSP content using include mechanism.

Task:

- Include header/footer JSP file
- Display combined output

8. Error Page

Description:

Create a custom error page in JSP.

Task:

- Handle exceptions
- Display user-friendly message

9. MVC Example

Description:

Implement MVC using Servlet and JSP.

Task:

- Servlet → Controller
- JSP → View
- Pass data from servlet to JSP

10. Mini Project – Login + Dashboard

Description:

Develop a simple web application with login and dashboard.
Use all above concepts in this project.
