5. What is the difference between props and state?
6. Why are props immutable in React?
7. How does React update the UI when state changes?
8. What is JSX and how does it work?
9. What is conditional rendering in React?
10. Why do we use keys while rendering lists?

Programs

1. Create a Student Management Application using:

Components

Props

State

2. Create a Todo Application with:

Add Todo

Delete Todo

Update Todo

Complete Todo

3. Create a Product Management Application using:

Array State

map()

Props

4. Create a User Profile Dashboard using:

Parent Component

Child Component

Props

5. Create a Dynamic Form Application using:

Components

State

Event Handling
